SUBJECT INDEX - VOLUME 24

3α-Acetoxy-5β-cholan-24-amide, intramolecular cyclisation of, 79
ACTH, induced protein synthesis and release, 177
Adrenal Corticosterone production, in rat, 527
Adrenal protein release, 177
Alcyonarian, natural products from, 387
Aldosterone,
  biosynthesis of, 451
  direct radioimmunoassay without chromatography, 587
Androgen binding proteins, in rabbits, 107
Androgenization, early, in rats, 281
Androgens,
  in rat tissues, 507
  plasma levels in hirsutism, 295
Androphilic proteins, in rat epididymis, 507
5α-Androsta-3β,17β-diol. metabolism of, 261
5α-Androstan-17β-ol-3-one,
  antiserum to and radioimmunoassay of in human plasma, 477
  binding protein of, 107
  -1α-carboxy thioether, synthesis of, 477
  product of testosterone-4-$^{14}$C incubated with normal human ovary, 311
  regional differences of in the castrated rat, 575
Androst-4-en-6β,11β-diol-3,17-dione, 6-hemisuccinate-BSA,
  synthesis of, 793
Androstendione,
  in cancer tumor, 519
  in hirsutism, 295
Androst-4-en-11β-ol-3,17-dione, highly specific antisera of, 793
Androst-4-en-17β-ol-3-one,
  dimeric, 613
  regional differences in thresholds of the epididymis of the castrated rat, 575
Antiestrogen activity, 63
Antiestrogens, *in vitro* inhibition of nuclear estrogen receptor binding, 209
Antisera, for estriol radioimmunoassay, 225
Aromatization, of $C_{19}$ intermediates, 411

Bioavailability, of prednisone, 95
Biosynthesis, of steroids in mare ovaries, 713
2,4-bis(bromomethyl)-3-methoxy-1,3,5[10]-trien-17-one,
  antiestrogenic activity of, 63
Bovine adrenal cells, regulation of aldosterone synthesis, 451
Brain, monkey, the uptake and metabolism of labelled testosterone in, 537
Bufadienolides, novel synthesis of, 377

Cardiotonic steroids, of the bufadienolide type,
  contribution to the synthesis of, 377
5β-Cholana-3α,24-diol-3α-acetoxy, intramolecular cyclisation of, 79
5β-Cholan-24-amide, intramolecular cyclisation of, 79
5α-Cholesta-3α,7α-diol-26-carboxylic acid, preparation of, 239
Cholest-5-en-3β,26-diol-16,22-dione, preparation of, 239

Cholest-5-en-3β-ol, side chain cleavage of, 703
Competitive protein binding assay (CPBA), cortisol level in teleostei, a justification by comparison with DIDA, 253
Contraceptive steroids, effect on estrogen metabolism, 849
Corticosteroid haptens, synthesis of, 739
Corticosterone metabolism, in rats, 679
Corticosterone production, in rat adrenal, 527
Cyclophosphamide, steroid derivative of, 737

Dealkylation, of phytosterol in insect, 165
Dealkylation inhibitor, in silkworm, 367
Desmosteryl sulfate, in hamster spermatozoa, 549
6, 11β-Dichloro-3β,17-dihydroxy-19-nor-4,6-pregnadien-20-one-17-acetate-3β-benzoate, prolonged activity of, 731
25,26-Dihydroxycholecalciferol, biological activity and synthesis of, 463
3β,7α- and 3α,7α-Dihydroxy-5α-cholestan-26-oic acids, preparation of, 239
1β,3β-Dihydroxy-5α-25α-spirostane (brisbagenin), conversion to 3β-hydroxy-5α-25α-spirostane (tigogenin) via 5α,25α-spirost-1-en-3-one (brisbenone), 203
isolation and characterisation from *Cordyline cannifolia*, 203

β-Ecdysone, radioimmunoassay of, 637
Ecdysones, from Meconium of the Tobacco Hornworm, 359
Epididymal androgen receptor, in rabbits, 123
Epididymis,
androgen binding protein in, 107
$C_{19}$-steroid acetylation and hydroxylation of, 261
Regional differences in androgen thresholds in the castrated rat, 575
3-Epi-20-hydroxyecdysone, from Meconium of the Tobacco Hornworm, 359
24,28-Epoxystigmast-5-en-3β-ol, synthesis of, 367
Estetrols, in pregnancy urine, 185
Estradiol,
interaction of in rat adrenal, 527
measurement of unbound fraction in plasma by steady-state gel filtration, 809
metabolism of, 849
Estradiol-$d_2$, synthesis of, 343
Estradiol-17β,
metabolism of, 687
radioimmunoassay of, 665
serum levels after estradiol benzoate injection, 657
4-$^3$H, preparation and metabolism of, 687
hydroxysteroid dehydrogenase, in morulae and blastocysts, 57
[$^3$H]Estradiol-17β-succinyl, in bovine serum albumin, 825
Estradiol binding protein, in rat, 437
Estradiol receptor, 437
Estra-1,3,5(10)-trien-3,16α,17β-triol,
radioimmunoassay of, 225
radioimmunoassay of unconjugated in human pregnancy plasma, 327
Estriol-$d_2$, synthesis of, 343

Estrogen,
  induction of 20α-hydroxysteroid dehydrogenase, 765
  metabolism of, 15, 775
  production of, 15
  -protein, conjugate of, 825
  receptor, in rat, 437
  receptors, in human uterus and breast carcinoma, 489
Estrogens,
  effect of on serum gonadotropins, 41
  in pregnancy urine, 185
  in rat plasma, 31
Estrone,
  in cancer tumor, 519
  metabolism of, 849
  -$d_4$, synthesis of, 343
17α-Ethinyl-4-estrene-3β,17β-diol, dimeric, 613
Ethynylestradiol, effect on estrogen metabolism, 849
17α-Ethynylestra-1,3,5(10)-trien-3,17β-biol, antisera of, 803
17α-Ethynyl-3-methoxyestra-1,3,5(10)-trien-17β-ol, antisera of, 803

Fetal gonad, steroidogenesis in, 703
Fetectomy, effects of on plasma steroids, 887
$\alpha_1$-Fetoprotein, in rat, 437
Fucosterol-24,28-epoxide, 165

Gas chromatography-mass spectrometry,
  identification of $C_{19}$ intermediates, 411
  of steroids, 185
Gonadotropins (FSH and LH), effect of estrogens on, 41
Guinea pig, steroidogenesis in, 703

2β,3β,14α,20R,22R,25-Hexahydroxy-cholest-7-en-6-one (β-ecdysone), 637
Hirsutism,
  plasma androgen levels in, 295
  unbound fractions of testosterone and estradiol in plasma, 809
Hormones, from Meconium of the Tobacco Hornworm, 359
Hydrolytic enzymes, influence on estrogen receptors and
  estradiol-receptor complex, 489
2-Hydroxyestradiol,
  as a metabolite of estradiol, 687
  as metabolite of estrone and estradiol, 849
18-Hydroxyestriol, in pregnancy urine, 185
4-Hydroxyestrone, as a metabolite of estradiol, 687
18-Hydroxyestrone, synthesis of, 627
7α-Hydroxy-testosterone, formation of in testes, 753
Hydroxylation, of testosterone, 875
20α-Hydroxysteroid dehydrogenase, in mouse vagina, 765

24,28-Iminostigmast-5-en-3β-ol, synthesis of, 367

Marine sterols, polyhydroxylated, 387
24-Methylcholestane derivative, from alcyonarian, 387
24ξ-Methylcholesta-3β,5α,6β,25-tetraol-25-acetoxy, 387

2-Methyl-5α-cholest-2-ene, preparation of from 5α-cholestan-3β-ol, 135
Monkeys, plasma progesterone and estrogens after fetectomy, 887

27-nor-(24S)-24-Methylcholesta-5,22-dien-3β-ol, from an annelida, 399
Nuclear receptor, progesterone complex in, 599
Nutritional effect in insect of sterol derivative, 165

Oligomeres, steroid, 613
Ontogeny, of receptor, in rat, 437
Ovary,
  normal human, presence of $\Delta^4$-3-oxosteroid 5α-reductase in, 311
  steroid biosynthesis in, 713
Oxaazaphosphorane, 17-spiro, 737

Pituitary,
  anterior in rat, metabolism of pregn-4-en-20α-ol-3-one in, 351
  monkey, the uptake and metabolism of labelled testosterone in, 537
  response of to increased serum estrogen in immature female rats, 657
Pituitary hormones, effect of on corticosterone metabolism, 679
Placenta, human, $C_{19}$ intermediates in, 411
Polyhydroxylated steroid, from alcyonarian, 387
Polyethylene glycol, preciptation of steroid antibodies with, 665
Prednisone, radioimmunoassay of, 95
5α-Pregnan-20α-ol-3-one, formation from 20α-DHP in
  anterior pituitary in rat, 351
Pregn-4-en-20α-ol-3-one, anterior pituitary metabolism of in rat, 351
Pregn-4-en-11β,17α,21-triol-3,20-dione, determination and
  comparison of level by CPBA and DIDA, 253
Progesterone,
  in rat plasma, 31
  metabolism of by pseudohermaphrodite rat testes, 139
  metabolism, in mouse vagina, 775
  metabolism of in subcellular fractions of uterus, 839
  receptor in rat uterus, 599
Progesterone-$^3$H, exchange assay of, 599
Prolactin, release of in response to estradiol, 657
Prostate, $C_{19}$-steroid acetylation and hydroxylation of, 261
Puberty, adrenal function in rats, 281
α-Pyrones, synthesis of, 377

Rabbit, TeBG in, 123
Radioimmunoassay,
  blank values in paper chromatography, 1
  for serum dehydroepiandrosterone without chromatography, 317
  of Androst-4-en-11β,ol-3,17-dione, 793
  of corticosteroids, 861
  of estriol, 225
  of plasma estradiol, 665
  of prednisone, 95
  of unconjugated estriol in human pregnancy plasma, 327
Rats, pregnant and pseudo-pregnant, determination of
  progesterone and estrogens in, 31
Rat uterus, mechanism of action of some antiestrogens in, 209
Reptilian adrenal, steroidogenesis, 151

Sephadex (G-10), in column radioimmunoassay of unconjugated estriol in human pregnancy plasma, 327
Sleep, testosterone level in plasma during, 191
5α,25α-Spirost-1-en-3-one (brisbenone), isolation and characterisation from *Cordyline* sp, 203
Steroid, bifunctional alkylating, 63

Teleostei, cortisol levels in eel and goldfish plasma, 253
Testes, metabolization of testosterone in, 753
Testicular androgen binding protein (ABP), in rabbits, 123
Testosterone,
  formation of in pseudohermaphrodite rat testes, 139
  hydroxylation of, 875
  in plasma during sleep, 191
  measurement of unbound fraction in plasma by steady-state gel filtration, 809
  metabolization of in testes, 753
  metabolization, in the brain and pituitary of the male Rhesus monkey, 537
Testosterone-17-glucosiduronate, metabolism of in the rat, 557

Uterus,
  estrogen receptor in, in rat, 437
  progesterone metabolism in subcellular fractions, 839
